## Summary

Results driven Software Engineer with over 6 years of experience and a track record in developing sophisticated Web and Desktop applications. My diverse background includes developing software across various industries such as supply chain management, project management, AI, big pharmacology, and telecommunications.

I am passionate about learning and thrive in environments that encourage growth and productivity. My professional career has allowed me to work with a wide range of technologies, including Java, JavaScript, AWS, Spring, React, SQL, Groovy, Grails and more. My expertise lies in backend development but I am familiar with FE development and technologies like React and mobile technologies like Android SDK and React Native.

My ideal role is one that fosters an environment of continuous learning and professional development.

## Employment

---

<b>Software Team Lead</b>	<b>Vodafone</b>	<b>April 2024 - present</b>
---------------------------	-----------------	-----------------------------

As a Software Team Leader at Vodafone, I spearhead the development of our website's features, combining my deep passion for technology and continuous learning. My leadership is characterized by fostering a collaborative environment, encouraging innovation, and maintaining open communication channels with both colleagues and stakeholders. This approach not only enhances our team's efficiency but also ensures we consistently deliver high-quality solutions that meet our users' evolving needs.

**Technologies used:** Java, Spring, AWS, SQL, Git, Datadog

**Product developed:** <https://www.vodafone.co.uk>

<b>Backend Software Engineer</b>	<b>Vodafone</b>	<b>Feb 2023 - March 2024</b>
----------------------------------	-----------------	------------------------------

In my role as a Backend Software Engineer at Vodafone, I elevated the checkout experience on [vodafone.co.uk](https://www.vodafone.co.uk) to unparalleled smoothness, directly enhancing user satisfaction. My dedication to innovation and operational excellence, evidenced by surpassing 80% of my Objectives and Key Results (OKRs) and garnering outstanding peer feedback, propelled me to a leadership position. Additionally, my recognition as Top Talent—a distinction shared by only four individuals—underscores my commitment to pushing the boundaries of technology and teamwork.

**Technologies used:** Java, Spring, AWS, SQL, Git, Datadog

**Product developed:** <https://www.vodafone.co.uk>

<b>Senior Java Software Engineer</b>	<b>Zuhlke Engineering Ltd</b>	<b>Oct 2022 - Dec 2022</b>
--------------------------------------	-------------------------------	----------------------------

Brief period at this consulting company due to a temporary lull in demand for Java Backend Software Engineers (inflation raising and recession was predicted).

<b>Full Stack Software Engineer</b>	<b>IQVIA</b>	<b>Feb 2022 - Oct 2022</b>
-------------------------------------	--------------	----------------------------

Full-stack development for a Phase I eSource and clinical trial automation system which is used by the biggest pharmaceutical companies in the world (e.g. 3 of top 5 pharmaceutical companies). I collaborated efficiently with Project Managers, Biomedical Engineers and Product Owner in order to deliver the best results for clients.

**Technologies used:** Groovy, Grails, Java, AWS, JavaScript, SQL, Git, HTML, CSS

**Product developed:** <https://www.clinspark.com/>

<b>Software Engineer</b>	<b>Diffblue</b>	<b>Aug 2020 - Feb 2022</b>
--------------------------	-----------------	----------------------------

In this role, I developed software in Java in an Agile environment for Diffblue Cover, a tool powered by AI that automatically generates (unit) tests for Java code. I made a consistent commitment to growth by embracing continuous learning (i.e. each Sprint I studied a new topic relevant for my work) and by taking new responsibilities (e.g. lead stand-ups and Sprint Retrospectives). Last, but not least, I set up and maintained an online environment where the product could be demoed.

**Technologies used:** Java, Spring (basic usage), JUnit, Maven, Git

**Product developed:** <https://www.diffblue.com/products/>

**Junior Full Stack Engineer**

**New Verve Consulting**

**Aug 2019 - Aug 2020**

Played an important role in the development and launch of a cloud add-on for Jira. The add-on allows you to bring context to Jira tickets by linking them to customer data. I helped through pair-programming sessions one of my colleagues to transition from a Technical Consultant position to a Developer one. Managed my time successfully between writing my MSc dissertation and this position.

**Technologies used:** JavaScript, React, Node, Jest, Git, HTML, CSS

**Product developed:** <https://bit.ly/3zKtngM>

**Junior Software Engineer**

**SSI Schaefer Romania**

**Sept. 2017 - Aug 2018**

Got exposed to the world of professional software development with Java as well as finished my last year of BSc studies in Computer Science. I worked on the development of software for a vertical lift module (LOGIMAT) that allowed goods in a warehouse to be stored and managed efficiently. Managed my time successfully between this position and my last year of BSc studies.

**Technologies used:** Java, SQL, JUnit, HQL, Git

**Product developed:** <https://logimat.ssi-schaefer.com/logimat-en-gb>

---

**Education**

**Online**

**University of Oxford**

**May 2024 - present**
