Summary

A self-motivated and hard working individual interested in mobile/web development and personal growth.

Experience

Remote Full Stack Engineer

Mar 2020- Present

New Verve Consulting

2 months +

My position level is still Junior and my responsibilities are the same as before but I work mostly from home.

Junior Full Stack Engineer

Aug 2019 - Feb 2020

New Verve Consulting

7 months

Crumbs

- Implement, test and document features for a cloud CRM app that runs on Jira Service Desk; we use following tech stack:

JavaScript, Node.js, AWS Lambda, React, Jest, Babel, Webpack, Serverless

- For the development the team uses Kanban Agile methodology

- We use Bitbucket and Git for source version control, Bamboo - continuous integration, Jira - project management, Confluence - documentation and requirements, Slack - team messaging communication

Junior Software Engineer

Sep 2017 - Aug 2018

SSI SCHÄFER

1 year

- Implemented whole requirements using Java, Sql, Hql in conjunction with some internal frameworks

- Wrote unit tests for existing and new features using JUnit

- Used Git for version control, Gerrit - continuous integration, Jira - tasks/bugs management, Jenkins - building/automating the project
